

Mopar® Introduces 2011 Challenger Drag Pak for Sportsman Racers

This One Has a V-10 and is Race-ready

- Mopar® Challenger V-10 Drag Pak built for sanctioned NHRA Stock and Super Stock configurations
- Priced at \$85,512, Mopar to build 70 serialized units
- Production starts 1Q 2011, applications available now at local Dodge dealerships or at www.mopar.com
- Past Mopar Challenger Drag Pak model-year programs sold out (2009 and 2010)

September 30, 2010, Auburn Hills, Mich. - Racers rejoice. Mopar® is dropping a V-10 into the iconic Dodge Challenger.

The new race-only V-10 powered rear-wheel drive 2011 Mopar Challenger Drag Pak features an 8.4-liter 512 cubic-inch engine with a 2-speed automatic transmission. Mopar will showcase its new drag car this evening at the Dodge Viper Owner's Invitational in Salt Lake City. The vehicle will then make its way to the Specialty Equipment Market Association (SEMA) show in Las Vegas from Nov. 2-5, and the Performance Racing Industry (PRI) show in Orlando from Dec. 9-11.

"With the introduction of our new 2011 Mopar Challenger Drag Pak, Mopar will be the only place to get a factory-built V-10-powered race-ready drag car," said Pietro Gorlier, President and CEO of Mopar, Chrysler Group's service, parts and customer-care brand. "Mopar's new Challenger Drag Pak is a race rocket that will appeal to racers, collectors, dealers, and Dodge Viper owners."

Based on the 2011 Dodge Challenger and finished in a Stock Eliminator and Super Stock configuration, the 2011 Mopar Challenger V-10 Drag Pak is the first and only 500-plus cubic-inch V-10 drag-race package car. The car features competition wheels and tires, a Mopar solid rear axle with performance gear ratio, a 2-speed drag race transmission with integrated roll control, a complete competition fuel system with fuel cell, and a complete interior with gauge package.

The Mopar Challenger V-10 Drag Pak features a Bright White paint scheme with color options. The Manufacturer's Suggested Retail Price (MSRP) is \$85,512 and production begins early next year.

Mopar offers three options with this vehicle. First, the Competition Package includes an eight-point roll cage, six-point safety harness and a mesh window net (MSRP: \$7,950, part number P5155820). Second, a Mopar logo body wrap (MSRP: \$950, part number P5155892) and a range of body colors (MSRP: \$6,800, part number P5155893). With the Competition Package, the car is ready to go down the drag strip.

Orders must be submitted using the Mopar Challenger V-10 Drag Pak Application, which is available now at www.Mopar.com, the Mopar Direct Connection Tech Line at 888-528-HEMI (4364), or a local Dodge dealer. Customers should work with their local Dodge dealer to submit their application.

- WiFi: first to offer customers the ability to make their vehicle a wireless hot spot
- WiTECH: first to support vehicle diagnosis and software updates leveraging off-the-shelf personal computers and a dedicated wireless tool network

About the Mopar Brand

Mopar is Chrysler Group LLC's service, parts and customer-care brand.

Mopar distributes approximately 280,000 parts and accessories in more than 90 countries and is the source for all original-equipment parts for Chrysler, Dodge, Jeep® and Ram Truck vehicles. Mopar parts are unique in that they are engineered with the same teams that create factory-authorized vehicle specifications for Chrysler, Jeep, Dodge and Ram vehicles - a direct connection that no other aftermarket parts company can provide. A complete list of Mopar accessories and performance parts is available at <http://www.mopar.com>.

More Than 70 Years of Mopar

When Chrysler bought Dodge in 1928, the need for a dedicated parts manufacturer, supplier and distribution system to support the growing enterprise led to the formation of the Chrysler Motor Parts Corporation (CMPC) in 1929.

Mopar (a simple contraction of the words MOTO and PARTS) was trademarked for a line of antifreeze products in 1937. It also was widely used as a moniker for the CMPC. The Mopar brand made its mark in the 1960s - the muscle-car era. The Chrysler Corporation built race-ready Dodge and Plymouth "package cars" equipped with special high-performance parts. Mopar carried a line of "special parts" for super-stock drag racers and developed its racing parts division called Mopar Performance Parts to enhance speed and handling for both road and racing use.
