The Chrysler Foundation Powers Up 2013 FIRST Robotics Season; Awards \$6,400 to Kingman High School

January 3, 2013, Auburn Hills, Mich. - As the 2013 FIRST (For Inspiration and Recognition of Science and Technology) robotics season starts on Jan. 5, The Chrysler Foundation awarded a \$6,400 grant to Kingman High School in Kingman, Ariz. The grant will help the team offset costs associated with items such as registration fees, parts and materials and team apparel.

Kingman High School, located near Chrysler Group's Arizona Proving Ground where the company tests its Chrysler, Dodge, Jeep®, Ram Truck and Mopar® brand vehicles, is one of 25 schools nationally to receive grants totaling \$147,000 from the Chrysler Foundation, the philanthropic arm of Chrysler Group LLC. The Chrysler Foundation will also award \$29,000 in additional funds to boost the championship runs of teams qualifying to compete at the FIRST Championship, April 24-27, in St. Louis, Mo. In 2012, nine teams received additional funds. This year, The Chrysler Foundation has committed a total of \$181,000 to FIRST teams and programs.

"The FIRST program is an ideal platform for inspiring the next generation of science and technology leaders that are vital to our industry as well as many others," said Mark Chernoby, Head of Vehicle Engineering and Vice President - Executive Coordinator, Chrysler Group LLC. "We hope that by engaging students at an early age, we can provide the spark that inspires them to become tomorrow's engineers."

The Chrysler Foundation also awarded a \$5,000 grant to the "FIRST in Michigan" program to support district and statewide robotics competitions.

"The Chrysler Foundation and Chrysler Group are proud to help students discover the rewards and excitement of education and careers in science, engineering, and technology," said Jody Trapasso, Senior Vice President - External Affairs, Chrysler Group LLC and President - The Chrysler Foundation. "We are equally proud of our employees who generously mentor students and serve as competition coordinators."

About FIRST

Accomplished inventor Dean Kamen founded FIRST (For Inspiration and Recognition of Science and Technology) in 1989 to inspire an appreciation of science and technology in young people. Based in Manchester, N.H., FIRST designs accessible, innovative programs to build; self-confidence, knowledge, and life skills while motivating young people to pursue opportunities in science, technology, and engineering.
