### **Fiat S.p.A. Named to Dow Jones Sustainability Indices World and Europe for Fifth Consecutive Year**

September 11, 2013, Auburn Hills, Mich. - As continued recognition of its leadership in sustainability, it was announced today that Fiat S.p.A. has been included in the prestigious Dow Jones Sustainability Indices (DJSI) World and Europe for the fifth consecutive year. The Group's economic, environmental and social performance place it among the world's leading companies: membership in the DJSI World and DJSI Europe equity indexes is limited to companies judged best-in-class when compared with the majority of their peers based on selected sustainability criteria.

### **Sustainability at Chrysler Group**

Chrysler Group is committed to charting a sustainable course that balances the demands of environmental, social and economic aspects. The measurement of success must go beyond the traditional bottom line and extend to recognition of the environment and the needs of individuals both inside and outside the Company. While Chrysler Group works to continually create an exciting lineup of fuel-efficient vehicles, the entire enterprise is committed to minimizing the impact its products and processes have on the global environment.
