Jeep® Patriot Concept

August 7, 2005, Auburn Hills, Mich. -

The legendary Jeep® brand hints at global portfolio expansion and explores all-new territory with the world premiere of two compact SUV concepts—the Jeep Patriot and Jeep Compass. The Jeep Patriot and Jeep Compass concepts are compact Jeep 4x4s that would deliver fun, freedom, utility, capability, as well as the potential for exceptional fuel economy and interior flexibility—all at a great value. The two concepts make their world premiere at the Frankfurt International Motor Show (IAA) on September 12.

The Jeep® Patriot concept offers a modern interpretation of classic Jeep styling: rugged, strong and capable. It would appeal to young buyers looking to join the brand in a genuine Jeep vehicle that would deliver fun and freedom at a great value. Jeep Patriot not only looks like a Jeep, but all-new Jeep off-road technology would ensure Patriot could be a Jeep Trail Rated 4x4, making it the most capable vehicle in its class.
