**Statement: Electrical Connectors**

August 14, 2015, Auburn Hills, Mich. - FCA US LLC is conducting a voluntary safety recall to correct a condition in an estimated 77,834 U.S.-market sedans that may lead to engine stall or gearshift to neutral.

**The Company is unaware of any related injuries or accidents. The condition, which may be accompanied by a dashboard warning-light illumination, does not affect air-bag function.**

An investigation by FCA US revealed some electrical connectors were damaged when the supplier conducted post-production validation tests.

Affected are certain 2015 Chrysler 200 midsize sedans. Additional vehicles also are included in campaign. Of these, approximately 7,115 are in Canada; 848 are in Mexico; and 19 are outside the NAFTA region

Affected customers will be advised when they may schedule service, which will be performed free of charge.

Customers with questions or concerns may call the FCA US Customer Care Center at 1-800-853-1403.
