Method of Determining Monthly Sales. FCA US reported vehicle sales represent sales of its vehicles to retail and fleet customers, as well as limited deliveries of vehicles to its officers, directors, employees and retirees. Sales from dealers to customers are reported to FCA US by dealers as sales are made on an ongoing basis through a new vehicle delivery reporting system that then compiles the reported data as of the end of each month. Sales through dealers do not necessarily correspond to reported revenues, which are based on the sale and delivery of vehicles to the dealers. In certain limited circumstances where sales are made directly by FCA US, such sales are reported through its management reporting system.
