

Statement: Shift Strategy

April 22, 2016, Auburn Hills, Mich. - FCA US LLC is voluntarily recalling an estimated 811,586 mid-size SUVs and full-size cars in the U.S. to reduce the effect of potential driver error by enhancing warnings and transmission shift strategy.

An investigation by FCA US and the National Highway Traffic Safety Administration found some drivers have exited their vehicles without first selecting "PARK." Such behavior may pose a safety risk if a vehicle's engine is still running.

The Company is aware of 41 injuries that are potentially related. **The vehicles involved in these events were inspected and no evidence of equipment failure was found.**

The vehicles affected by this recall are equipped with electronic shift levers that return to the same position after each manipulation. Gear-selection is conveyed to the driver by multiple sets of indicator lights, not gear-selector position, and unless due care is taken, drivers may draw erroneous conclusions about the status of their vehicles.

The vehicles also deliver warning chimes and alert messages if their driver-side doors are opened while their engines are still running and "PARK" is not engaged. However, investigation suggested these measures may be insufficient to deter some drivers from exiting their vehicles without selecting "PARK," so FCA US will enhance the warnings and transmission-shift strategy on these vehicles.

The enhancements will combine warnings with a transmission-shift strategy to automatically prevent a vehicle from moving, under certain circumstances, even if the driver fails to select "PARK."

Affected by this campaign are certain model-year 2012-2014 Dodge Charger and Chrysler 300 sedans, and model-year 2014-2015 Jeep Grand Cherokee SUVs. Also subject to recall are an estimated 52,144 vehicles in Canada; 16,805 in Mexico; and 248,667 outside the NAFTA region.

Affected customers will be notified when service becomes available. **In the interim, FCA US urges customers to follow the instructions in their owners' manuals. (See PDF link to the right under ATTACHED.**)**

To address customer-satisfaction issues, the Company began equipping the Charger and 300 with a new shift-lever design in model-year 2015. The Grand Cherokee's shift-lever was updated in model-year 2016.

Customers with questions may call the FCA US Customer Care Center at 1-800-853-1403.
