Stellantis Announces Investment and Plans for Trenton, Michigan, Engine Complex

- Includes \$24.7 million investment and new engine program for south plant
- Production line at north plant to be decommissioned; building expected to be repurposed
- Actions provide maximum flexibility for plant

June 30, 2022, Auburn Hills, Mich. - Stellantis today announced plans for the two facilities that comprise its [engine complex](#) in Trenton, Michigan, which will provide maximum flexibility for the operation.

The plan includes a \$24.7 million investment to retool the south plant to be a flexible engine line, capable of producing the two variations of the 3.6-liter Pentastar V-6 engine.

Following retooling, the Pentastar production line at the north plant will be decommissioned by the end of 2022 and all 3.6-liter engine production at the complex will be consolidated at the south facility.

First launched in 2011, the Pentastar engine quickly became the workhorse of the Chrysler, Jeep®, Dodge and Ram product lines, streamlining the company's V-6 engine offerings from seven to one. Upgraded in 2016, the redesigned V-6 delivers improved fuel economy and performance over the original version of the same engine, which will continue to be produced through 2023. Production of the Pentastar upgrade in the south plant is expected to begin by the end of Q1 2023.

The north plant is expected to be repurposed for warehousing and other non-manufacturing opportunities.

Stellantis North America

Stellantis (NYSE: STLA) is one of the world's leading automakers, aiming to provide clean, safe and affordable freedom of mobility for all. In North America, it's best known for producing and selling vehicles in a portfolio of iconic, innovative and award-winning brands, including Jeep®, Chrysler, Dodge//SRT, Ram, Alfa Romeo and Fiat. Stellantis is executing its [Dare Forward 2030](#), a bold strategic plan that paves the way to achieve the ambitious target of becoming a carbon net zero mobility tech company by 2038, while creating added value for all stakeholders.
