Mopar Brand

Mopar distributes approximately 280,000 parts and accessories in more than 90 countries and is the source for all original equipment parts for Chrysler, Jeep, Dodge Car and Dodge Ram vehicles. Mopar parts are unique in that they are engineered by the same teams that create factory-authorized vehicle specifications for Chrysler, Jeep and Dodge vehicles – a direct connection that no other aftermarket parts company can provide.

More than 70 Years of Mopar

When Chrysler bought Dodge in 1928, the need for a dedicated parts manufacturer, supplier and distribution system to support the growing enterprise led to the formation of the Chrysler Motor Parts Corporation (CMPC) in 1929.

Mopar (a simple contraction of the words MOtor and PARts) was trademarked for a line of antifreeze products in 1937. It also was widely used as a moniker for the CMPC. The Mopar brand made its mark in the 1960's – the muscle car era. The Chrysler Corporation built race-ready Dodge and Plymouth "package cars" equipped with special high-performance parts. Mopar carried a line of "special parts" for super stock drag racers and developed its racing parts division called Mopar Performance Parts to enhance speed and handling for both road and racing use.
